How this affects your energy bills

An average household would need to spend £754 per year on heating,

This is **based on average costs in 2018** when this EPC was created.

People living at the property may use different amounts of energy for

hot water and lighting in this property. These costs usually make up the

Estimated energy needed in this property is:

This property's current environmental impact rating is C. It has the

Properties get a rating from A (best) to G (worst) on how much carbon

Carbon emissions An average household produces

This property's potential 1.9 tonnes of CO2 production
